Education

Vishwakarma Institute of Information Technology, Pune (CSE AI) – CGPA: 8.95	2023 – 2027
Chh. Shivaji Junior College, Vaduj – HSC: 87.17% (Rank 2)	2022 – 2023
Sadguru Manajibaba Vidyalay, Palashi – SSC: 98% (Rank 1)	2020 – 2021

Skills

- **Languages:** C, C++, Python
- **AI / Machine Learning:** Machine Learning, Deep Learning, NLP, Computer Vision, n8n Automation,
- **AI Tools Frameworks:** Numpy, Pandas, Matplotlib, Seaborn, PyTorch, TensorFlow, Prompt Engineering
- **Web Frameworks:** HTML, CSS, JavaScript, React JS, MongoDB, MySQL
- **CS Fundamentals:** Data Structures & Algorithms, OOP, Operating Systems, DBMS
- **Other Tools:** Figma, Git, GitHub, Colab, Jupyter, Power BI, Tableau

Experience

Research Intern – CME Pune Jan 2026 – April 2026 (Hybrid)
During my Research Internship at CME Pune, I analyzed 9+ peer-reviewed studies on nanofluid-based evacuated tube solar collectors to evaluate thermal performance improvements using nanoparticles such as Al_2O_3 , and hybrid nanofluids. I identified research gaps and proposed a Python-based AI/ML framework for performance prediction and optimization, aiming to enable data-driven modeling as an alternative to complex CFD simulations.

Frontend Developer Intern — Solitera Software Pvt. Ltd. Oct 2025 – Present (Remote)
Contributed to the development of **Floxapad**, a project management and test automation platform. Independently developed the complete **Regression Suite module** and built a custom **Smart Editor for automation**. Performed theme migration, resolved UI bugs, and collaborated in code merges within an Agile workflow. Developed an **AI-powered PID Generation utility** to automate creation of Project Initiation Documents, improving efficiency and reducing manual effort through intelligent content generation.

Projects

Construction Site Safety Monitoring using YOLOv8 March 2025
Published in IEEE Conference (DOI: [10.1109/ICCUBEA65967.2025.11284142](https://doi.org/10.1109/ICCUBEA65967.2025.11284142))
Developed a computer vision model to detect safety helmet compliance on construction sites. Trained model on a custom dataset and evaluated performance using Precision, Recall, and mAP metrics.

BankBot - Voice Banking Assistant (MERN + Web Speech API) March 2026
GitHub: <https://github.com/pratikshad267/voice-agent>
Developed an offline-first, multilingual voice banking platform for branch kiosks. Implemented real-time language detection (English/Hindi), and customer feedback widget. Presented at PS-02 Hackathon (Team AlgoNexus). Technologies: React, Node.js, Hugging Face NLP models, HTML5 Audio APIs.

AgriConnect AI - Agricultural Intelligence Platform (MERN + Hugging Face Model) March 2026
May 2026
GitHub: <https://github.com/pratikshad267/AgriConnect-AI>
Built an AI-powered platform for crop disease detection, market price analysis, and government scheme recommendations. Presented at Tech Fest Hackathon (Katalyst India, MathWorks, Salesforce).

Certifications

- Complete Machine Learning Bootcamp – Udemy
- Automation in n8n – Udemy
- Computer Vision Bootcamp using PyTorch and TensorFlow – Udemy
